A graduate of Management and Production Engineering. Currently a warehouse worker. In my previous jobs I had an opportunity to deal with English-speaking clients. At the beginning of 2021, I became interested in the subject of programming - using the information obtained on the Internet, I created some of my own applications in Python. I systematically expanded my knowledge, learning about HTML and CSS technologies, as well as the basics of SQL relational databases and the GIT version control system. Currently I am studying JavaScript ES6 with the React framework. I am looking for my first professional experience as a Developer in your company.

## Skills

### Python

Frameworks: Django and Flask basics

### HTML5, CSS

Frameworks: Bootstrap

### JavaScript ES6 - basic

Frameworks: React.js basics

### SQL, GIT

Basic

## Languages

English (B2) • German (A1)

## Projects

### Portfolio Website

<https://maciejimbierowicz.netlify.app>

My portfolio website made with React.js.

### Website - "Spiders Collection"

<https://spiderscollection.herokuapp.com/>

A site about tarantulas with simple registration and login system. Technologies: Django, Bootstrap.

Hosting: Heroku, Amazon AWS.

### Space Invaders

<https://github.com/maciejimbierowicz/Space-Invaders-v1.0>

My version of classic arcade game, made with Python's Turtle Graphics framework.

### Other Projects
